**Safety Gloves; Hidden Danger**

Have you ever found yourself in a position where you needed to use gloves to protect your hands? Point is: A lot of people use gloves in their everyday from cooking, to cleaning, or even saving lives – but are they good enough to protect your skin from the dangers outside?

**What's the Deal with Gloves?**

As of late we've come to realize that gloves aren't enough! Did you know that the longer you wear a latex glove the more prone you are to contract a Latex Allergy? Did you know that around the world there are over 13 million people that are affected by a Latex Allergy and the US (Although it has been declining since the 90's) has approximately 7,000 new cases annually? You can get the allergy by wearing one for too long, this weakens the latex material and allows the toxic accelerators out into your skin, or into the air you breath causing the allergy, but that's not all. Some gloves, latex or not, are lined with a donning powder (For ease of insertion) which can cause Contact Dermatitis! Gloves In A Bottle® prevents the fear of the potential Latex Allergy, even if you already have one, as it is a Shielding Lotion, it will keep the Latex off of your skin because it acts as a second layer of skin. There are alternatives like Nitrile and Vinyl but like latex they too have their downside. Not to hate on gloves, we think they are incredibly helpful but overall are not enough. They are supposed to be creating a second layer of skin, instead they are creating a second layer of skin damage. But don't worry, if you have been affected by these troubles Shielding Lotions™ work with your skin preventing more irritants into your skin and allowing your skin to heal itself.

What should you do? Look no further than Gloves In A Bottle® – Shielding Lotion™. A Shielding Lotion™ is a lotion that bonds with the outer layer of skin cells, enhancing the skin's ability to retain natural oils and moisture, assisting the skin's ability to protect against irritants, harsh soaps and other common household and cosmetic products that strip moisture out of the skin. Gloves In A Bottle® was originally made with miners dealing with harsh chemicals and conditions in mind, imagine the protection you will receive when using Gloves In A Bottle® for yourself.
